

Centrally Archive Exchange Server Emails

'Email archiving solutions are too expensive and cumbersome for small to medium sized companies'.

With Policy Patrol Archiver, SMBs no longer have an excuse for not archiving emails. Policy Patrol Archiver offers state-of-the-art email archiving at a surprisingly low cost, bringing professional email archiving within reach of any business. Despite its low cost, Policy Patrol Archiver offers an easily and quickly configured solution, with robust archiving security, fast search and retrieval functions, while at the same time boosting Exchange Server performance.

Policy Patrol Archiver

Email Archiving & eDiscovery Solution

Policy Patrol archives emails and attachments into a central database, providing full text search on all emails and most attachments – including Microsoft Word, Excel, PowerPoint, PDF files and many more.

Archiver Benefits

- Aid compliance & meet Auditor requirements
- Ease eDiscovery process
- Decrease storage & boost Exchange performance
- Enforce retention policy
- Decrease IT workload & user frustration
- Optimize knowledge management

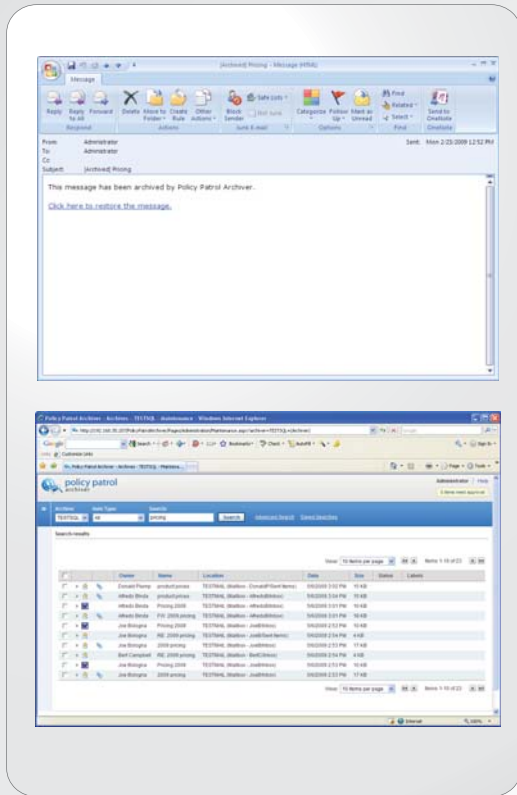

Features

- Automatically moves data to the archive
- Uses single instance storage and compression
- Can export archived emails and attachments
- Web interface to search and restore emails
- Role based access to emails in archive
- Apply tags for email categorization
- Message stubbing
- Audit logging
- Life cycle management

Support for all email clients

Policy Patrol can archive mails sent from Outlook, Outlook Express, Outlook Web Access and handheld devices such as Blackberry; as long as the message is sent via the Exchange Server, Policy Patrol will archive it.

System requirements:

- Windows Server 2003 or 2008
- Microsoft Exchange Server 2003 or 2007
- Microsoft SQL Server 2005 or 2008
- Microsoft .NET Framework 2.0

Instant Email Archiving

Since Policy Patrol Archiver archives emails when they are sent and received, even if a user deletes an email from their inbox, the email will still be in the Policy Patrol archive.

Meet eDiscovery Requirements

For eDiscovery and compliancy reasons, it is important to be able to prove that archived data is original and unchanged. Policy Patrol stores emails and documents in their original format and uses Windows authentication to control access to the application and database.

Access Archive Through Web Interface

Users can access their archived emails through a user friendly web interface. They can also search on message body, subject, recipient, sender, attachments, file content and tags. Frequently used searches can be saved and re-used at a later date.

Life Cycle Management

Compliance officers can set life cycle periods for records so that emails and attachments are deleted at set schedules from the archive.

Decrease Exchange Storage

Policy Patrol can 'stub' emails (email body is replaced by a link that allows the user to restore the message) and/or remove messages from Exchange Server entirely, reducing the Exchange Information Store size, decreasing backup and restore times as well as boosting performance.

User Permissions

Policy Patrol Archiver allows you to assign different roles to different users to determine their view and restore permissions. Managers can for instance view emails of subordinates. Only users assigned as compliance officers are able to view all users' messages and delete data.

Auditor Role

Policy Patrol allows you to give an Auditor access to your archive, but only to those files marked for the Auditor. This avoids giving access to more information than required and allows the Auditor to work more effectively.

Single Instance Storage

Policy Patrol Archiver uses single instance storage and compression to keep the archives as compact as possible.

Spam Free Archive

Policy Patrol Archiver can prevent your archive from containing irrelevant content by not archiving the contents of specific folders such as junk mail or RSS feeds.

Disclaimers in Archive

If you use Policy Patrol Disclaimers in conjunction with Policy Patrol Archiver, all your disclaimers will be included in the archived emails.
